

Drivers Action Plan

Introduction

Based on your review of data from the infrastructure assessment, identify at least two priorities or drivers to strengthen. Teams may wish to prioritize drivers where they have the most flexibility or ability to act, or drivers where the team has generated the most change ideas during the assessment discussion. Create an Action Plan using the template below that identifies actions focused on improving the infrastructure, or implementation drivers, to support use of the selected program or practice.

Implementation Drivers: Action Plan
